25X1A	Comment. The present report confirms the existence at Mittenwalde of a KVP supply installation, which was mentioned previously.  The establishment of a Zentrales Versorgungslager (ZVL) (Central Supply Depot) in the Berlin area may be connected with the activiation of the Armeegruppe Nord of the KVP. The Mittenwalde supply depot may have been established as a branch of the ZVL at Prossen near Bad Schandau, because the latter depot was too far away	<u> </u>
